We're driven because you're driven. Pursuit of perfection is what gets us out of bed in the morning. Pursuit of perfection is what drove us for two years of designs, reviews, and more designs. Perfection is the only thing we are willing to offer you.

A Study in Perfection. Our strength training experts and your commercial buyers drew-up their dream designs. Nautilus engineers made those dreams a reality. A few big changes and a lot of subtle ones result in the easiest to use, highest performing line of commercial free weights we've ever developed. Details you'll discover include new user-friendly adjustment mechanisms, innovative and thoughtful bench designs, and modern hi-tech frame shapes that make you want to reach out and touch them. Perfection?

Nautilus® Olympic Benches handle over 600 pounds of plate storage. The brushed chrome-plated (5/16" thick) bar holders contain two catch positions, and accommodate Olympic bars. The vertical bar catches for easier racking to accommodate weight lifted up to 700 pounds.

The Nautilus® Commercial Free Weight line uses 11-gauge steel frame tubes to incorporate a new, softer curved profile for a strong, modern look. Pivot points use durable bronze bushings, along with a 3-point base design which results in a self-leveling bench. Multiple color options are available for the frame and upholstery.
