

Anchor Back

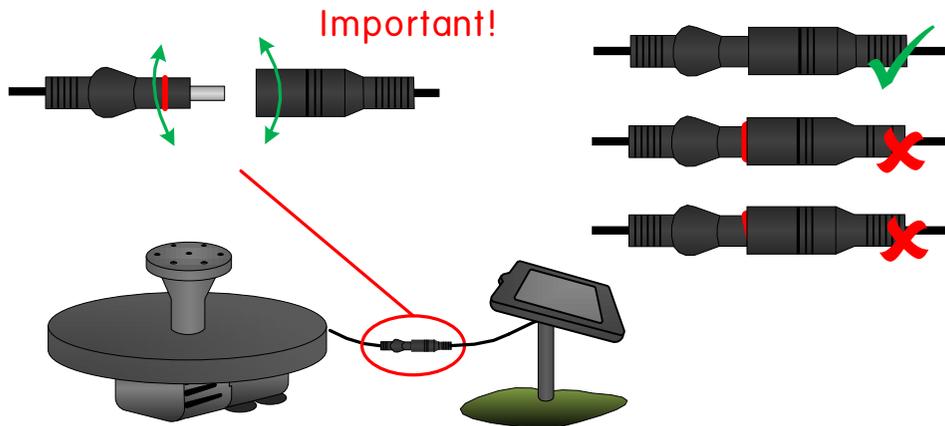

To prevent the pump moving around use the anchor sack and line provided. Fill the sack with stones and tie it to the pump, the length of line can be altered to limit how far the pump can move.

Solar Panel Mounting / Position

Position the solar panel to receive the maximum amount of direct sunlight.

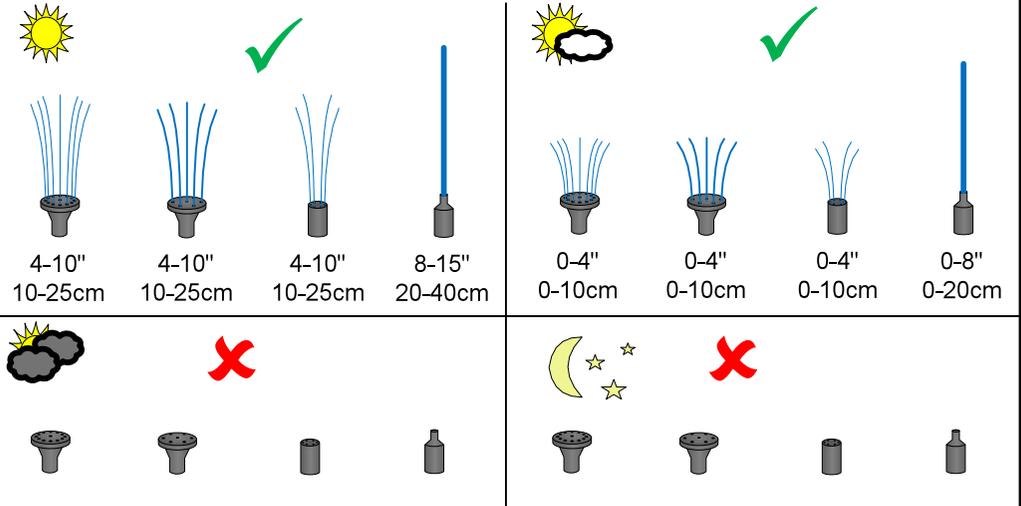

Connections

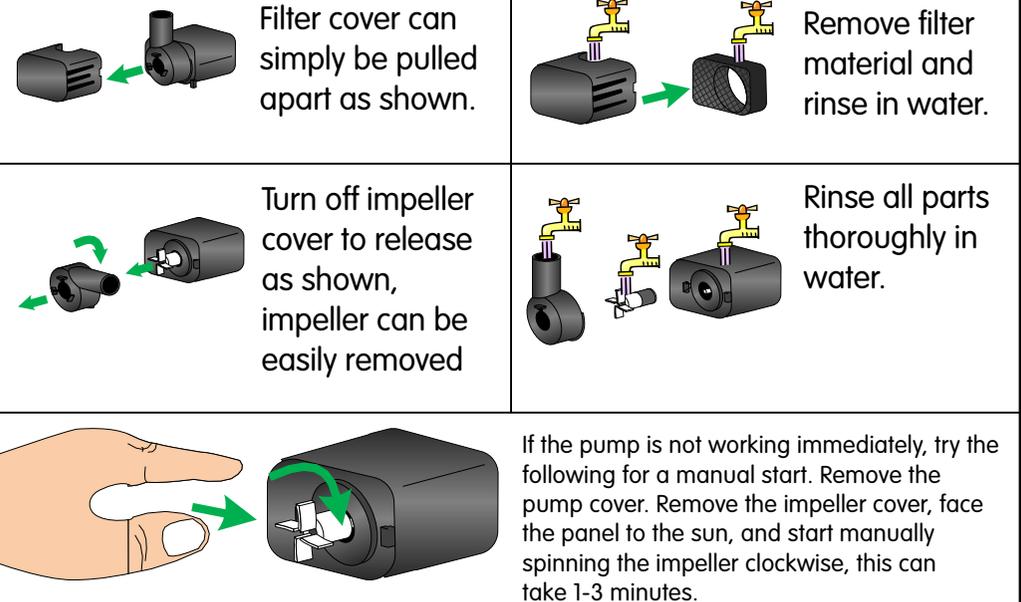

Ensure connection from solar panel to pump are water tight.

Performance

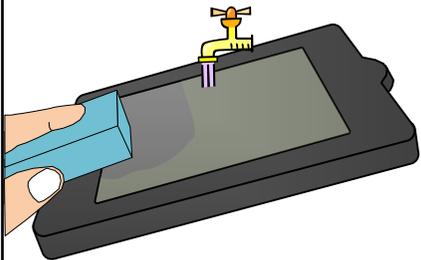

This product is designed primarily to operate in summer months but will also work in spring and autumn provided there is good sunshine. Performance is directly related to the amount and strength of sunlight received.

Pump Cleaning / Troubleshooting

Maintenance

To maintain optimum performance, regularly clean the solar panel using water or glass cleaner in conjunction with a non-abrasive sponge or cloth.

PROBLEM	RESOLUTION (and page for reference)
The fountain is in sun but the pump is not working.	<ol style="list-style-type: none"> 1. Ensure the connectors from the pump to the solar panel are secure - see pg. 2 2. Ensure the pump is connected to the tube securely - see pg. 1 3. Try Manual Pump Start - pg 3 4. There may be an air bubble in the tube. Try pouring water down the tube to force out the air bubble.

Smart Living Home & Garden warrants your solar panel, pump and battery (for Solar-on-Demand units) for one (1) year from the original date of purchase from authorized distributors and retailers. The warranty covers parts that are properly installed and regularly maintained. If the product fails due to a defect in material or workmanship, Smart Living will replace the defective parts free of charge. Your fountain is designed for outdoor use and with proper care will last for many years. If over time your fountain develops scratches or minor wear from normal use, you can contact our customer service department for easy to apply one step touch up paint.

Please unpack and inspect the entire product upon receipt. Report any broken or missing pieces within five (5) business days of receipt to our customer service department and we will provide replacement parts free of charge. Please do not discard any damaged parts until instructed to do so by our customer service department.

Sunjet 150+

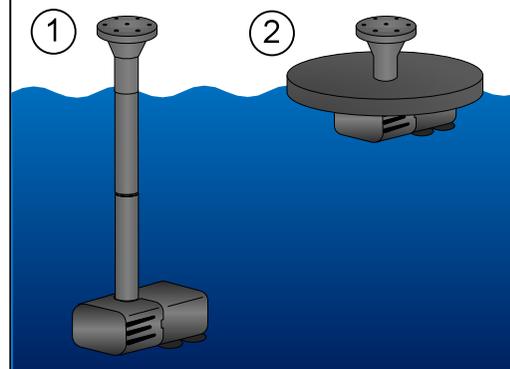

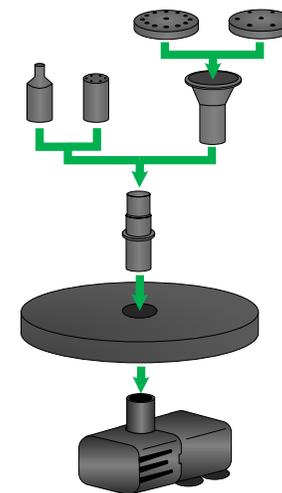

Assembly

The Sunjet 150+ can be placed under water or can float on the water surface. Your choice will depend on the water depth and type of reservoir used. If the water depth is shallow, we suggest the under water assembly. For deeper reservoirs or ponds, you will need to use the floating assembly.

① Pump placed under water

② Pump floating on water surface

Warnings

0°C/32°F

Important!

Frost causes damage. Store whole product inside during cold weather.
