

AWC280DZ - 28 Bottle Dual Zone Built-In Wine Cooler

The Avallon AWC280DZ built-in wine cooler combines luxury and style to create a superior storage environment for your treasured wine collection. Its two precise, independently-controlled cooling zones enable you to keep both red and white wines at their optimal storage temperatures: 10 standard Bordeaux size bottles in the top temperature zone and 18 bottles in the bottom temperature zone. State-of-the-art Argon filled double paned glass filters harmful UV rays away from your collection; acts as a thermal barrier, reflecting unwanted heat and making the unit more energy efficient; and the clear glass displays your bottles clearly. A top performing unit in the market, the AWC280DZ utilizes air cooling technology, which allows for even air dispersion and precise temperatures within the unit, differentiating it from other units that use outdated cold plates. A solid, seamless stainless steel door gives this wine cooler the finished look that makes it perfect to build in under your counter or use in a free standing application. The matching stainless steel front vent and solid handlebar offer perfect modern and sleek finishing touches. The upscale internal finishes of this unit give you the full luxurious experience. Touch panel digital controls and rolling stainless steel fronted wood shelves provide a high-end look while also providing superb and easy-to-use functionality. The included carbon filter blocks unwanted odors, and blue LED lights in each temperature zone add to the overall deluxe look and feel of the wine cooler. An upgraded compressor and anti-vibration gasket leave your wine undisturbed and make for proper aging of your wine collection. Finally, rest assured that your wine collection will be safe with the included security lock.

FEATURES AND BENEFITS

- Fan forced air dispersion for powerful, even cooling
- Argon filled dual paned glass
- Stainless steel fronted rollout wood shelves
- Electronic touch controls with digital display
- Upper zone bottle capacity of 10 bottles
