* see Cancellation and Refunds tab for more details.

Our prepaid SIM Cards will work on any **Unlocked GSM Phone**, wireless GSM Home Security Alarm System on the 2G 3G and 4G spectrum, Smart watches and GPS trackers. Designed for users that need a minimal amount of airtime each month/year.

Majority of GPS trackers and Home Security Systems today uses cellular technology to remotely communicate with these system and devices.

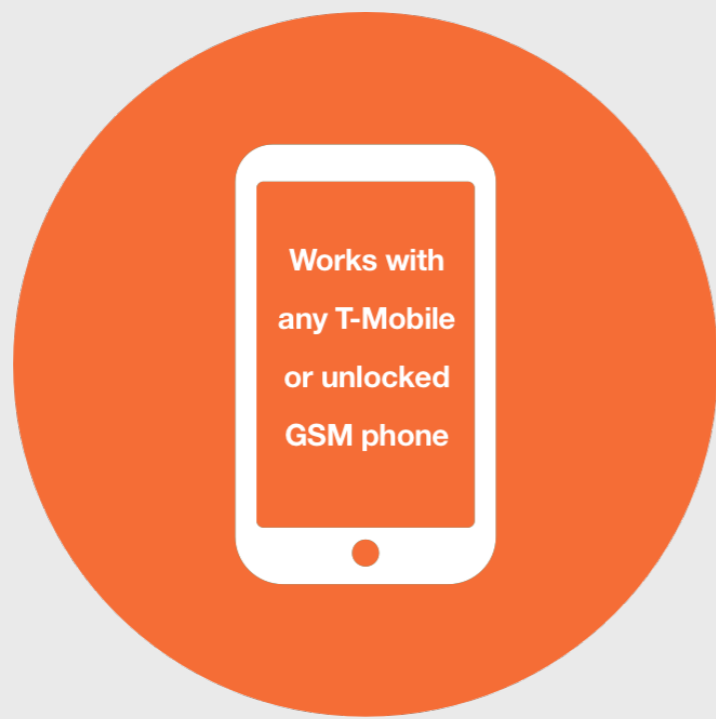

With a **GSM GPS tracker**, you will need a SIM card to enable tracking services to work. You can communicate with the tracker remotely via the phone number associated with the prepaid SIM card. Some use text messaging to locate the tracker, other devices use data connection. Either way, our prepaid SIM cards offer Voice call, text and nationwide 2G 3G and 4G data.

Choosing which prepaid plan is best for your tracking device will depend on how often the tracker is set-up to report location.

With **Home Security Systems**, if the system was set-up to report activity via text messaging then users will be notified via text messages. Another example, every time the system is Arm/DisArm, a text or voice call is transmitted remotely depending on how the system was set-up.

Choosing which prepaid plan will work for you will depend on how the Security System is set-up for activity notifications.

The same concept applies to **Smart Watches**.

SpeedTalk Mobile is one of the fastest growing and affordable mobile service providers in the United States.

We are dedicated to the idea that everyone deserves a phone to stay connected with the world. We have a wide range of 2G, 3G, 4G LTE plans with popular and easy to use mobile devices, along with world-class U.S. based customer support.

Terms and Conditions

By purchasing this item and following activation, you will receive 30 days of wireless service from SpeedTalk Mobile.

This plan only works within the United States and does not work internationally.

In this offering, you will receive a SIM card and an instructional flyer. This 30 day plan can be activated once on the Nation fastest growing wireless networks on which SpeedTalk provides service to as long as the device is compatible with that network.

SpeedTalk utilizes the best network in America for talk, text and data service. Please review the [coverage map](#) to ensure that you reside in an area where service is provided on your device. You likely do, but you will want to verify.

Activate service via Activatespeedtalk.com.

You will not be able to exceed the allotted amount of voice or texts. If you exhaust your credits, you may purchase additional credits (Cash Cards) directly at RefillSpeedtalk.com.

When you are running low on your credits, a notification message and an email will be sent to you. You will also receive a notification that your service will expire on the last day of your service term. You will be notified to refill your account with additional service(s) should you exhaust any allotment for either voice or text, or when your service term expires.

You must utilize a compatible device in order to use SpeedTalk Mobile. Any device that is currently active under a contract, has been suspended for non-payment, or reported lost or stolen may be ineligible for use with this service. Additional exclusions may apply.

We do not ship items outside of the USA or to Freight Forwarders. Service plans that are sold to Freight Forwarders will be cancelled and refunded
