

Clean Park® Limited Warranty

Auto Care Products, Inc. warrants your Clean Park® to be free from defects in material and workmanship for a period of three (3) years from the date of purchase for the 50 mil mat, and one (1) year for the 20 mil mat, subject to the following conditions and limitations:

Conditions:

- This warranty only applies to the original purchaser of the Clean Park®.

Limitations:

This warranty does not cover the following:

- Improper installation of the Clean Park®.
- Placement of the Clean Park® on any surface that is not smooth and flat.
- Improper use of the Clean Park®.
- Use with snow chains or studded snow tires.
- Punctures caused by rocks and other sharp objects.
- Use of Solvents, Chemicals and Detergents to clean the Clean Park®.
- Normal wear and tear.
- Discoloration of the vinyl sheeting that may occur over time.
- Tire impressions made on the vinyl sheeting, which is considered normal.

Should a defect occur, contact Auto Care Products, Inc. to request a Return Authorization Number. No returns will be accepted without a Return Authorization Number. It is the responsibility of the customer to pay for all shipping costs including insurance. Upon receipt of the returned part(s), Auto Care Products, Inc. will either repair or replace the defective part(s) as it deems necessary.

Clean Park®

Warning:

- The Clean Park® is Slippery When Wet.
- To use with Snow Chains or Studded Snow Tires, purchase Protector Strips from Auto Care Products, Inc.
- Do Not Turn Front Tires While Vehicle is Stationary on the Clean Park®.

U.S. Patent #6,258,430

New Improved Design

Assembly Instructions

Lay out all the edge pieces before beginning assembly.

1. Sweep or vacuum garage floor. Repair or cover (with duct tape) any cracks in garage floor.
 2. Lay out all of the edge pieces before beginning assembly.
 3. See figure 1. Starting at the edge closest to the street, attach the small (approximately 2.5") V-shaped side piece to the front edge of the mat, 2" in from the left side.
 4. See figure 2 & 3. Slide one of the bottom ramp sections (mushroom-shaped profile) under the mat, so that it butts up against the previously attached small V-shaped side piece. The bottom ramp section should be aligned with the tallest part of the V-shaped piece. Next, snap on one of the top ramp sections onto the bottom ramp section. Continue attaching the remaining ramp sections onto the mat. See figure 4. Finally, attach the other small V-shaped side piece next to the last ramp section.
 5. See figure 5. Attach one of the long (approximately 24") V-shaped side pieces to the left side of the mat, next to the previously installed small V-shaped side piece. Continue attaching the long V-shaped side pieces down the left side of the mat. Repeat this step on the right side of the mat.
 6. See figure 6. On the end farthest away from the street, cut down vinyl sheet so it protrudes 1½" beyond the last long V-shaped side piece.
- NOTE:** All Clean Parks® can be shortened by 2' increments just by omitting long V-shaped side pieces and cutting the vinyl sheet, as described above.
7. See figure 7. On the side farthest away from the street, attach the short (approximately 18") V-shaped pieces.

Warning:

Rocks and other sharp objects may puncture the Clean Park®. To avoid punctures, regularly remove debris by sweeping with a soft bristle broom.

Cleaning Instructions:

Remove one or more of the end pieces closest to the garage door. Be careful not to puncture or cut the vinyl sheeting with the edge of the top piece as you pull it off. Sweep the Clean Park® with a soft bristle broom. Hose off the Clean Park®. Use a soft bristle broom to push water towards the open area, off of the Clean Park®. Only a mild dish soap may be used on the Clean Park®. Do not use solvents, harsh chemicals, abrasive cleaners or bleach. Discoloration of the vinyl sheeting may occur over time and does not affect the integrity of the material.

Cold Weather Assembly Tip

In extremely cold weather, the vinyl sheet may become stiff, making it difficult to attach the edge pieces. To soften up the vinyl sheet, bring the vinyl sheet inside the house and allow it to warm up to room temperature.

Or

Use a hair dryer and blow warm air along the vinyl sheet, as you attach each edge piece.

DO NOT USE A HEAT GUN
