

Panasonic®

Performance Plus™ Platinum Vacuum Cleaners

Panasonic introduces the All Floors canister and power nozzle line-up to meet the challenging and changing needs of cleaning different home flooring. Some customers need a new canister vacuum. Others just need a new or different power nozzle. Either way - Panasonic's All Floors is the answer.

MC-CG955 Complete Canister

MC-CG957 Complete Canister

The MC-CG955 Multi-Surface Canister is designed for homes with primarily hard surface flooring and area rugs.

The MC-CG957 Plush Pro Canister is designed for homes with carpeting of all types including the new Ultra Soft types.

**MC-PN150
Power Nozzle Only**
Designed for hard surface flooring and area rugs. This nozzle will fit most Panasonic canisters with metal telescoping wands.

**MC-PN250
Power Nozzle Only**
Designed for carpeting of all types. This nozzle will fit most Panasonic canisters with metal telescoping wands.

Concept

MC-CG955 Multi Surface Canister
MC-PN150 Multi Surface Nozzle

Solid and mixed surfaces are the norm for today's new homes and each surface has its own cleaning challenge. The MC-CG955 Multi Surface is the first power nozzle canister designed to be used with the agitator "ON" for superior and gentle cleaning of area rugs, stone, hardwood floors and tile.

MC-CG957 Plush Pro Canister
MC-PN250 Plush Pro Nozzle

Ultra Soft is the fastest growing category of carpet. Traditional vacuums with high suction and low carpet clearance can suck down and into soft carpets making the vacuum very hard to push and pull. The MC-CG957 Plush Pro uses Air Infusion Technology to free the suction lock with excellent grooming and cleaning results.

Common Features

OptiFlow Technology and HEPA Media Filter

With the double-wall bag chamber construction, the dust bag sits in a vented caddy that allows air to flow freely between the caddy and the outer wall, so even as the bag fills with dirt, air can move freely maximizing suction and performance.

OptiFlow Bag Caddy

Changing bags is easy with OptiFlow. Simply remove the caddy with the full bag and carry it to the trash for the bag disposal. Insert the new bag into the caddy and return the caddy to the vacuum. No more getting on the floor with the vacuum or handling the bag on the way to the trash.

Full Size Tools-on-Board

Each vacuum comes with a full size set of tools stored in the compartment under the top lid. Choose from a crevice tool, 9 inch bare floor/wall brush, or the combination tool (bristles on for dusting/bristles off for upholstery). All tools fit on the end of the telescopic wand or on the end of the handle for steps.

Variable Power/Suction Control

Hi suction is great for carpets and bare floors but many cleaning tasks need a lower level. Full power can draw area rugs to the bottom off the nozzle. The variable power control is in fingertip range so you can reduce fan motor speed and suction to any task.

360° Hose Swivel

As you move about the room the hose needs to move too. With 360° hose swivel, the hose rotates freely on the top of the canister so you can focus on the task and not struggle with a twisted hose.

Pet Friendly

Included air turbine pet tool removes stubborn pet hair from furniture and steps.

Unique Nozzle Features

MC-CG955 Multi Surface Canister MC-PN150 Multi Surface Nozzle

Edge Grabber

Pivoting shutter on front of nozzle opens 90° to allow agitator bristles all the way to the edge. Great for all solid surfaces and steps.

Hard-to-Reach Cleaning

The multi-angled nozzle pivots vertically to reach into spaces only 3 inches wide. Now you can clean all those areas too narrow for brushed cleaning with a traditional vacuum.

Triple Action Agitator

3 unique brush rows provide smooth floor buffing, recessed surface cleaning and carpet/rug surface agitation.

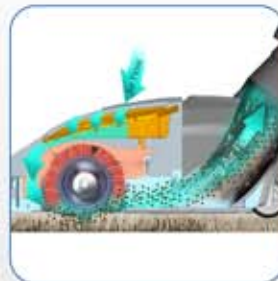

MC-CG957 Plush Pro Canister MC-PN250 Plush Pro Nozzle

Air Infusion Vents

Vents on the top of the nozzle open and close automatically in response to high sealed suction from soft or dense carpets. On traditional carpets, rugs and hard surfaces, the vents remain closed to allow full suction and air flow for the cleaning performance you expect.

Agitator Shut-off for Bare Floors

Handle switch allows fingertip control of agitator motor for easy on and off when moving between carpets, rugs and bare floors.

Belt Protector Sensor

Shuts off the agitator motor to protect the belt if an unexpected object gets caught in the bristles.
