

**Step 16. Attach Stacking/Tilting Tub**

Set the Rear Pegs of the Tilting Tub into the Rear Peg Slots in the Rear Frame. Lower the Tub to insert the Front Tub Pegs into the Front Frame Peg Holes. Apply light pressure to all four corners of the Tub to fully seat the pegs. NOTE: This Tub will tilt like a dump truck and can be easily lifted off the frame.

**Step 17. Using End Walls**

The Flatbed has a square hole in each corner. Slide the short legs of the End Walls into the two square holes of the flatbed on either end. Add the Optional Tool Rack on any one of the three sets of elongated holes on the End Wall to hold fishing poles or other tools. (Use the Tool Rack on rear End Wall to line up with holes located on the Rear Frame.)

**Step 18. Optional Fishing Pole Holders**

Slide the two Fishing Pole Holders over the top posts of the Front End Wall and snug fit them to base of posts.

**Step 19. Installing Tub on End Walls**

Put Mighty Max Cart in its Shortest Length. Set Tub on the Tapered Tops of the End Walls. Press Down on the Tub Corners to securely Seat Tub. Now you have a Double-Decked Carrier.

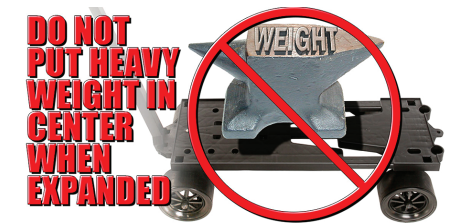

**Step 20. Optional Bungee Cords**

Fasten the Bungee Cord hooks underneath the Flatbed Cart frame as shown here. There are also two holes on each set of posts on each End Wall for fastening.

**Step 21. Optional Hitch Assembly**

Comes with 1-1/2" Delron Bolt / Locking Wing Nut to fasten to additional cart.
