1. 1 GB = 1 billion bytes, a portion of which is used for data management functions. 2. Test results are based on Sony's test environment with OS Windows 7 and are not guaranteed subject to PCs performance. 3. File Rescue downloadable software and EasyLock security software available at www.sony.net/Products/Media/Microvault. Does not support data recovery for Content Protected and Game Data files. Not all data may be recoverable. 4. Transfer speed may vary based on host hardware, software and usage. 8GB transfer speed is up to 110MB/s, 16GB up to 200MB/s, 32GB-128GB up to 226MB/s.
