- The list goes on and on

The Geneva Storage Activity Bench is an all steel welded sitting bench that doubles as a storage center. At 60" x 18", you'll have plenty of room to sit and relax. And, with more than ample space for storage, you can tuck away all the sporting goods, tools, gardening equipment and more.

Turn the corner on a dime with Geneva's new modular corner storage cabinets. Quickly maximize storage capacity in your garage or work area by utilizing wasted space on the wall. These all steel welded cabinets offer endless possibilities and are a top seller in the Geneva Garage Gear line.

Our work benches feature a solid hard-wood maple top that is 1.75 inch thick and has 12 square feet of work surface available to handle most projects.

Our base units and tall storage lockers offer excellent storage capabilities for larger tools, paint cans, cleaning supplies and more.

Our 2 door and 3 door service cabinets take wasted wall space and create a wonderful means of storage. With a fold down shelf feature, you'll be amazed at the increased functionality and versatility they offer.

Geneva's 5 drawer base cabinets are a must to max out your garage capabilities. From screws to cordless hand saws, you'll find ample space to store your supplies.
