OWNER’S MANUAL

Recommended Ages 3 - 6 years old
Maximum Weight: 80 lbs.

Assembly steps:
1. Unpack all parts and lay them out on a clean work space. Identify the components and compare to the drawing to be sure you have all parts.
2. Locate (1) Main frame and (2) Seat back frame. Slide the seat back frame into the main frame and depress the silver buttons while pushing the seat back frame further into the main frame. Push down until the silver buttons “pop” through the holes in the main frame.
3. Wrap (3) seat around the support bar on the main frame, and secure the Velcro to the bottom of the seat. Be sure that the Velcro strips are aligned well. Pinch the material together to secure the Velcro is completely engaged.
4. Insert (4) Steering wheel into steer tube so that the “Minimum Insertion” mark is completely covered. Align the steering wheel with the front wheel, and tighten the clamp bolt securely with a 13mm wrench.

To ride the Slalom racer:
1. Stand with both feet on the floor on either side of the slalom racer. Sit down first, then place feet on the front foot supports. Do not attempt to put your feet on until after you are sitting.
2. Turn the steering wheel back and forth to get moving. If you appear to be going backwards, rotate the steering wheel 180 degrees (half way around) and try again.
3. As you turn the steering wheel back and forth, you will become more efficient and start to move faster. You can also steer, and go backwards as needed, just by turning the steering wheel more or less. Note that this is similar to learning to swing higher and higher on a swing set; as you improve the timing of turning the steering wheel back, your acceleration will improve.
