Share Photos & Videos

Optimal Living Room Viewing Distance – 16.6 ft / 5m Active HDMI Cable to reach from your Couch to your HDTV. Instant set-up - just plug one end into your mobile device and the other into your HDTV.

Play Mobile Games

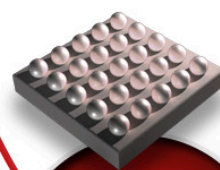

CouchConnect™ expands the mobile gaming experience for second screen mirroring from any iOS or Android device to the large screen HDTV.

Deliver Presentations

Deliver your latest presentation hassle-free from your iOS, Android or Blackberry 10 phone mirrored to your client's HDTV instantaneously with no set-up required. CouchConnect™ supports up to 4K UltraHD to maximize the visual impact of your presentation.

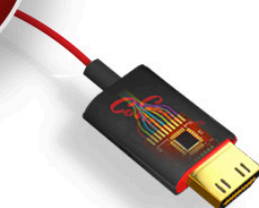

What is CouchConnect™

With CouchConnect™, you can enjoy your favorite apps or content already on your phone, tablet or laptop – photos, videos, games, TV shows and movies – on your Large Screen HDTV. By embedding Spectra7's patented high speed active signal processing silicon technology, CouchConnect™ is up to 5 times thinner and longer than current HDMI cables. No more crowding around that tiny screen; at 16.6ft, CouchConnect™ lets everyone sit back, watch and enjoy from the comfort of your living room couch. No need to ask the tech guru in your household to set up the wireless network or install yet another new application before you can access your favorite content. Instantly share last night's episode of your favorite show, real-time streaming content, video of the weekend soccer game, or the pictures your friend just posted on your favorite social media site — all mirrored from your mobile device onto your HDTV; so much more than what is available from the App Store or your online streaming service.

► Enabled by Spectra7's high speed, active embedded chip technology

The World's Longest, Lightest & Thinnest HDMI Cable
