

Bradley Grass Catcher Owner's Instructions

This catcher is intended for use by professional landscape personnel who have been trained in proper safety techniques and are physically capable of lifting heavy objects.

Installing the catcher

You will need to have a qualified person or your dealer install this catcher.

Removing and emptying the catcher:

- A. Turn engine off. Be sure blade has stopped rotating before proceeding to step B.
- B. While the catcher is still mounted on the mower, lift the pin out on the back of the catcher.
- C. Remove the catcher from the mower by lifting the back end and pulling the catcher out. Use proper lifting techniques to avoid back injury. Be sure you have secure footing before lifting.
- D. Empty the catcher by tipping it towards the back until the grass falls out.
- E. Put the catcher back on the mower.
- F. Secure the door.

Tips for cleaning and maximum utility:

Clean the catcher out at the end of each workday (especially if you have been mowing wet grass). The catcher will clean easily with a hose. If you keep the catcher clean, it will last much longer and allow greater air flow during operation for a better cut. Be sure to wear eye protection when cleaning. Never put your hands or any other body part inside the catcher. There can be sharp edges which may cut your hands or arms.

*******HEAVY LIFTING*******

If the catcher becomes too full for you to carry, prop the door open and empty some of the debris using a hoe or rake. **DO NOT OVERFILL ESPECIALLY WITH WET GRASS.** The catcher can become very heavy when full. While the catcher can take the heavy load, your body may not be able to use.

- √ Read warning label before using catcher.
- √ Failure to follow these instructions may result in serious injury.
- √ Never use mower without catcher or original grass deflector fully installed.
- √ Never operate catcher without door shut and secured.
- √ Always use eye protection when operating lawn mower.
- √ Keep others away from the mowing area.
- √ Do not use if you cannot safely lift heavy loads. Use proper lifting techniques.
- √ Make sure engine is off and blade has stopped rotating before removing or installing catcher.
- √ Do not mow on slopes. The fuller and heavier the catcher is the more likely the mower is to tip over or slip.
- √ Follow all safety instructions provided with the lawn mower.
- √ Do not use this catcher if it is damaged.
- √ Do not put your hand inside the catcher cuts or abrasions may result.

Warranty

This Bradley Grass Catcher is warranted against material and workmanship for 12 months from the date of purchase.
