VT-16TEDS
16 Bottle Thermoelectric Wine Cooler

This stylish unit keeps up to 16 bottles of your favorite wine chilled. Featuring a black cabinet with stainless steel door trim and handle and sturdy wire shelf racking for individual bottle storage. Its thermoelectric cooling system, which involves very few moving parts, helps protect your wine from unnecessary vibration.

The VT-16 TEDS also uses dual-paned glass windows, a technology that has been proven to have better insulation properties, better UV protection, and easier clean up. This energy efficiency will lead to less electricity usage and savings in energy bills throughout the years.

Features:

• Attractive freestanding cellar with dual-paned glass door
