ESP (Emergency – Security – Preparedness) Safety Shelters (ABOVE GROUND ONLY) offer the ultimate in multi-purpose protection and security for you and loved ones against violent acts of nature and multiple threats posed by man.

Each ESP Safety Shelter is verified by the National Storm Shelter Association (NSSA) to meet or exceed all ***FEMA P320/P361 and ICC-500 Code requirements*** when all installation guidelines are met (step-by-step installation checklist is provided with each ESP Safety Shelter). All Shelters have been designed by Registered Structural Engineers and have undergone a rigorous Third Party Review process.

Made in the USA ESP Safety Shelters will withstand the most extreme tornadic activity and offer a "safe zone" against home invasion offering critical minutes for emergency assistance to arrive.

ESP Safety Shelters (Proudly Made in Middle America by the Swisher Company – an American manufacturing company celebrating over 70 years in business) have been engineered to provide a "suit of armor" when you and your family need it the most.

ESP Safety Shelters are available in a variety of sizes offering a wide range of flexibility to meet specific family needs and work within multiple space requirements and locations.

The NSSA approved ESP Safety Shelter cuts no corners in materials or workmanship, utilizing 3/16" hot rolled steel construction and featuring multiple user-friendly safety benefits that are exclusive to the ESP Safety Shelter, e.g., Unique to the Industry Entrapment Protection and Patent Pending Sliding Entry/Exit "Panic" Door.

There are many more **ESP Safety Shelter** design features and options that are best explained via images and product videos. Please visit **www.ESP.swisherinc.com** for product images displaying the many design features and **ESP Safety Shelter** certification videos that will demonstrate the "extreme condition" construction and design of this tremendous Safety Shelter.

All available sizes/dimensions, *important Installation Checklist*, and easy step-by-step ordering and payment/pricing information (the Swisher Company has the capability to ship to your installation location nationwide) are available via the **ESP website**.

Statement from FEMA P-320: "Having a safe room built for your home or small business can help provide "near-absolute protection" for you and your family or employees from injury or death caused by the dangerous forces of extreme winds." Near Absolute Protection definition from FEMA P-361: Level of protection afforded to the occupants of a safe room built according to the guidance in the most current edition of FEMA P-361. Our current knowledge of tornadoes and hurricanes indicates that safe room occupants will have a very high probability of being protected from injury or death.
