

TRITAN
ALKALINE WATER BOTTLE

pH **REVIVE**

HEALTHY WATER
ANYWHERE, ANYTIME

[INVIGORATEDWATER.COM](https://www.invigoratedwater.com)

WELCOME!

Invigorated Water was founded on the desire to help provide clean drinking water to everyone, everywhere. We believe all humans have the right to this life essential element. Thank you for entrusting us with your water needs, we hope we can live up to your expectations!

For advice, support or feedback, please visit us at InvigoratedWater.com or follow the links on our homepage to our social media sites.

pH REVIVE- TRITAN ALKALINE WATER FILTER BOTTLE

Thank you for choosing pH REVIVE Alkaline Water Filter Bottle to invigorate your life!

With pH REVIVE you can produce clean fresh ionized alkaline water and take it with you anywhere, anytime! For optimal health benefits, simply follow the user instructions, and have access to ionized structured healthy living alkaline water wherever you go.

FILTER CONTENT

Our filters give you the very latest technology and highest quality materials using a proprietary filter recipe of Tourmaline, Activated Alumina, Maifan, Far Infrared, ORP, Alkaline Calcium and Zeolite.

FILTER FUNCTIONALITY

- ✓ Increases pH
- ✓ Creates high antioxidant water
- ✓ Increases Hydrogen
- ✓ Produces small molecular sized structured ionized water, for easy absorption and better hydration
- ✓ Removes chlorine, fluoride and heavy metals
- ✓ Re-mineralizes the water and adds trace elements, while helping the body better absorb vitamins and minerals
- ✓ Improves the taste and smell of water

USER INSTRUCTIONS

Prepare your filter by soaking it in water for 10 minutes. Discard the water.

Rinse and shake filter.

Wash your bottle safely by hand. Do not wash the filter.

Screw filter back onto lid base.

Fill up with water from your tap using the wide drinking tip or unscrew the cap. Do not use boiling water.

Shake the bottle vigorously allowing the water to pass through the filter. Wait for 10-30 minutes before drinking for optimal alkaline pH levels. Push button to flip open the cap. Enjoy clean, alkaline water!

LIFETIME

1
person

255
cups

30
days

2 years shelf life unopened. Once opened lasts for 255 cups / 16 gallons / 60 litres, 30 days. Estimated lifetime based on 8 cups per day.

STORAGE

Store max. 24 months in a dry, dark, cool place or sealed in your refrigerator. If you are not using your filter for a period of time after opening, we recommend you store it wet in a sealed zip top bag in your fridge, until you are ready to use it again.

USAGE

Take pH REVIVE alkaline water filter bottle with you and enjoy alkaline drinking water anywhere and anytime!

MAIN CHALLENGES WITH OUR DRINKING WATER

- pH Imbalance
- Increased levels of Heavy Metals
- Free Radicals cause harmful damage to our DNA, which can lead to inflammation

These are the main reasons people are feeling unwell and various conditions find the ground to appear and develop.

THE SOLUTION IS pH REVIVE

- Alkaline pH 9+
- Antioxidant: ORP -100mv
- Hydrogen H+ 200ppb
- Adds 20 Essential Minerals & Trace Elements
- Reduces Heavy Metals and Fluoride

PLEASE NOTE

- To test water pH levels, please use pH PERFECT reagent liquid. Test Stips (litmus) are generally made for testing saliva and urine and will not deliver accurate results. For more info visit www.invigoratedwater.com.
- There are many claims about having zero readings on your water, or a so-called 0 TDS (Total Dissolved Solids) when using a digital test meter, however we do not believe this is healthy. Reason is if all minerals and life essential trace elements are removed, the water is considered 'dead' water. It is no longer 'alive' with healthy minerals necessary for your survival. For this reason a TDS reading of around 50 PPM is absolutely normal when dealing with mineral water. Science confirms both Distilled Water and Reverse Osmosis (RO) support the claims of zero TDS, and are therefore considered unhealthy options in the long term.
- We do recommend you use any waste water, for your animals and plants, as they too can benefit from alkaline water. However, although alkaline water is considered beneficial for most everyone, some animals and plants may not do well exclusively on alkaline water, we recommend you conduct your own research and/or speak to a vet/horticulturist for any advice or concerns.

WHY ALKALINE WATER?

Running water through nature's many mineral stones gathered deep from the layers of the earth, naturally filters, purifies, structures and ionizes your water. Unlike ionization machines using an electrical current, the naturally structured and ionized water from Invigorated Water's filters provides a long lasting effect.

Our water gives you clean structured water with a molecular cell structure more able to penetrate your cells. This means your body can be hydrated on a cellular level, which may help to increase energy levels and mental clarity.

A key function of ionizing water is to change your water's current from positive to negative, giving you high antioxidant water with a high negative ORP (Oxidation Reduction Potential). This helps remove harmful free radicals that damage your DNA, giving your body a much needed antioxidant boost, so you can detox, restore & revive!

The goal with Alkaline Water is not to make you alkaline, but to balance your body's pH back to its original natural state of pH 7.32. You can easily measure your body pH by using Invigorated Water's pH PERFECT Test kit range, choose between our pH strips to measure your saliva or urine, or our pH reagent to measure your urine. When your body is too acidic, it can reach levels of acidosis, when too alkaline you reach a state of alkalosis. Neither are healthy for your body. Always aim to stay in your neutral body pH.

As we are constantly consuming food and drink that is acidic, we more often find ourselves in an acidic state. By drinking water that is pH 8 or above, our bodies can naturally heal and become more alkaline, which may reduce the acidity caused by our modern diet and restore balance to our neutral body pH of 7.32. By reducing acidity we can reduce inflammation, which is one of the key causes of injury and illness.

DOES YOUR WATER GIVE A 'NON ALKALINE' TESTING RESULT?

Litmus test strips may give inaccurate, false readings, as they are only meant to test the pH of your saliva and urine. We recommend using pH PERFECT, our pH test liquid containing Phenol Red, or a digital pH test meter, in order to get an accurate reading.

A few other things that may affect the testing:

- Please make sure you have prepared the filter properly, according to the instructions on page 5, giving it enough time to soak.
- Please test your water quality before using your new product. The filters, in general, will raise the pH levels 0.5 to 2 levels, so if your water quality is low on the pH scale, then it may not be possible to be brought up to an alkaline level, but it will get it closer.
- If you are still not getting an alkaline reading, please test the water again after 30 minutes, as the pH will continue going up the longer water stays in contact with the filter.
