How to Use

Electrowall

Electrowall creates an invisible barrier that V55 will not cross. This invisible barrier can be used to confine V55 to a particular room or area.

- Install battery first, then turn it on.
- Put the electrowall on the outside of the doorway you wish to block.
- Ensure the signal logo is facing forward and toward the opening you would like to block.
- Turn off the electrowall after each use.

TIPS:

- * Make sure which side is working area according to the stickers on the electrowall.
- * Place the robot in the "working area" to do cleaning.

Maintenance

Cleaning Side Brushes

Clean the side brushes when it gets dirty and replace it if it was damaged.

Note:

Before replacing side brushes, check and match "L" "R" marks on both and bottom of robot.

Cleaning Dustbin and Filter

Clean and empty dustbin after each use, steps are as shown in below figures.

- After taking dustbin, check whether there is foreign matter stuck in suck passage and clean it.
- Clean Filter after use for 10-30 days. And replace it after use for 6 months at maximum.
- Install both Filter and primary filters when they are dry.
- Filter and primary filter could be replaced if needed.

Cleaning Cliff Sensors and Charging Pins

Slightly clean the sensor window and anto charging pins with a soft dry cloth.

Note: Charging pins on charging dock need to clean if dirty.
