Quick Guide

Beer Growler

Assembly Instructions

1. Install all attachments to the coupler, build them into a tap system (the CO2 Cylinder is not included).
2. Open the tap handle and make sure the CO2 regulator is turned OFF.
3. Screw the tap system onto the growler.
4. Dial on the CO2 regulator to check if the CO2 Cylinder is active.
5. Pull the pressure release valve to vent the air in the growler.
6. Check the CO2 regulator is more than 0 psi.
7. Enjoy your nice beverages.

Quick Guide

Beer Growler

How to use?

1. Rinse the growler with warm water.
2. Take the growler to your favorite brewery.
3. Remove the tap top & have the growler filled.
4. Screw on the tap system and plastic cap.
5. Turn on the CO2 regular and slowly increase to 3-5 PSI.
6. Increase regulator pressure slowly to increase foam, release pressure slowly from safety value to decrease foam.
7. Tilt glass at 45 degrees and let beer pour out slowly.
8. Once the foam has decreased, increase PSI as required. Never increase it past 15 PSI.
