

CHEFMAN™

RJ12

ELECTRIC FOOD CHOPPER

Reduce prep time in the kitchen with this convenient 1-1/2-cup-capacity, Chefman Food Chopper. The compact but powerful unit works great for chopping or mincing vegetables, fruits, herbs, cheese, nuts, chocolate, and more. It basically accomplishes the same functions as a full-size food processor, but without having to haul out the big machine. The unit's pulse function sets the blade spinning and offers exceptional control over consistency, and its stainless-steel processing blade can be removed for thorough cleaning.

Other highlights include a transparent work bowl, a stable base, and a modern look that nicely complements any kitchen decor. Ideal for a one- to two-person household, the compact food chopper measures approximately 8 by 5 by 4 inches.

SPECIFICATIONS:

Unit Weight: 1.8 lbs
