

The RefresH2Go® Brand was established in response to consumers demand for safer, great tasting water anytime, anywhere. Bottled water has been filling this need for years, but can be extremely costly to consumers' wallets and to the environment. RefresH2Go® is a reusable bottle which filters tap water from any drinking fountain or faucet. It filters the water as you drink, resulting in great tasting water anytime, anywhere!

We are a women owned, family company that has more than 12 years of experience in the water filtration business. RefresH2Go® is committed to providing consumers with high quality on-the-go filtration products at an affordable price.

All of our products are tested and certified by an independent certification agency, ensuring high quality products for consumers. Our products are tested and certified by the Water Quality Association for materials safety and performance. If you are not satisfied with your bottle, please return to place of purchase.
