Finding Information

Please Read and Save This Guide

Thank you for choosing Electrolux, the new premium brand in home appliances. This Use & Care Guide is part of our commitment to customer satisfaction and product quality throughout the service life of your new wine cooler.

We view your purchase as the beginning of a relationship. To ensure our ability to continue serving you, please use this page to record key product information.

IMPORTANT

PLEASE READ all instructions completely before attempting to install or operate the unit.

All wine coolers require a connection to an electrical power source. Improper hook-up can result in a safety hazard and potential damage to the product or contents! Proper installation, in accordance with the manufacturer's specifications and all local codes, is the sole responsibility of the consumer. The manufacturer is not responsible for any installation expenses or damages incurred due to improper installation. If you are unsure of your ability to safely connect electric power to the unit, consult a licensed and insured professional to perform all electrical work.

Once you have your unit installed, we suggest you keep this manual in a safe place for future reference. Should any problems occur, refer to the "**Troubleshooting**" section of this manual. This information will help you quickly identify a problem and get it remedied. In the event you require assistance, please contact the dealer where you purchased your unit.

Make a Record for Quick Reference

Whenever you call to request information or service, you will need to know your model number and serial number. You can find this information on the serial plate located in the top left hand corner of your unit and on the product registration card.

Product Registration Card

The package containing this manual also includes your product registration information. Warranty coverage begins at the time your Electrolux wine cooler was purchased.

NOTE

Registering your product with Electrolux enhances our ability to serve you. You can register online at www.electroluxappliances.com or by dropping your Product Registration Card in the mail. Complete and mail the Product Registration Card as soon as possible to validate the registration date.

Please record the purchase date of your Electrolux unit and your dealer's name, address and telephone number.

Important Safety Instructions

Safety Precautions

Do not attempt to install or operate your unit until you have read the safety precautions in this manual. Safety items throughout this manual are labeled with a Danger, Warning or Caution based on the risk type.

Definitions

⚠ This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

DANGER

DANGER indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

WARNING

WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION

CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

IMPORTANT

Indicates installation, operation, or maintenance information which is important but not hazard-related.

General Precautions

WARNING

RISK OF CHILD ENTRAPMENT. Before you throw away your old appliance, take off the doors and leave shelves in place so that children may not easily climb inside.

WARNING

- **Never attempt to repair or perform maintenance on the unit until the electricity has been disconnected.**
- **Altering, cutting of power cord, removal of power cord, removal of power plug, or direct wiring can cause serious injury, fire and/or loss of property and/or life and will void the warranty.**
- **Do not lift unit by door handle.**

CAUTION

- **Use care when moving the unit. Some edges are sharp and may cause personal injury. Wear gloves when moving or repositioning the unit.**
- **Never install the unit behind closed doors. Be sure front grille is free of obstruction. Obstructing free air flow can cause the unit to malfunction, and may void the warranty.**
- **Allow unit temperature to stabilize for 24 hours before use.**

CAUTION

- **Use only genuine Electrolux replacement parts. Imitation parts can damage the unit and may void the warranty.**

Installing the Wine Cooler

Your Electrolux wine cooler has been designed for either free-standing or built-in installation. When built-in, your wine cooler does not require additional air space for top, sides or rear. In either case, the front grille must **NOT** be obstructed.

NOTE

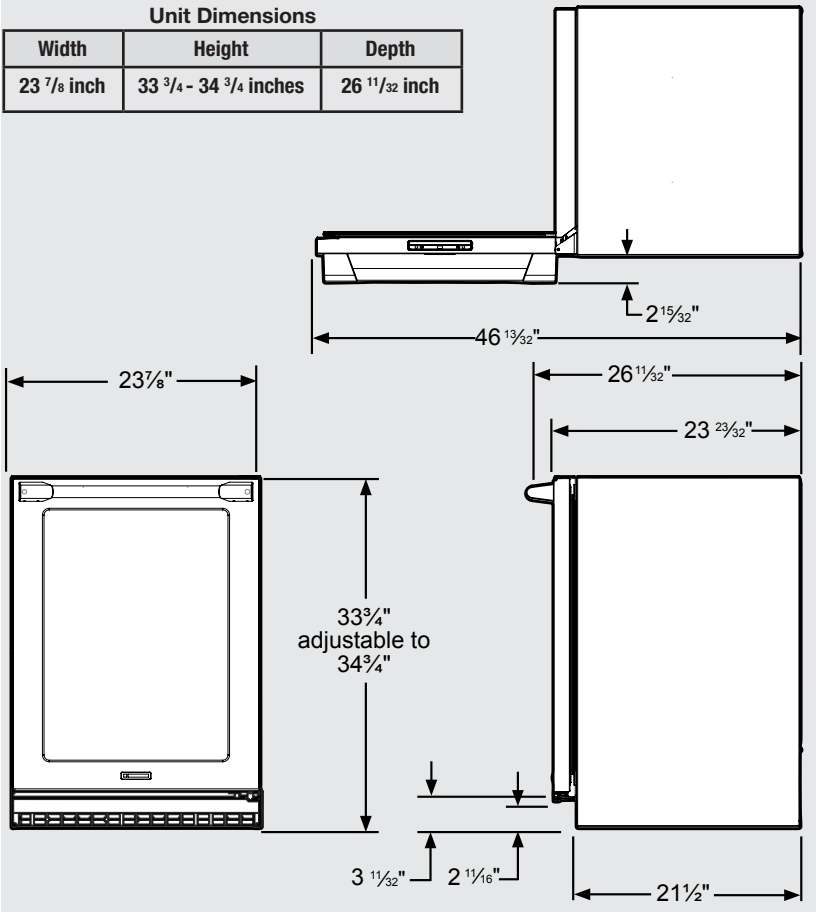

To ease unit installation and removal, it is recommended that the cabinet rough opening dimensions be increased by at least ¼ inch over the dimensions given for your unit.

NOTE

All units require zero clearance when installed flush with a cabinet or wall. Electrolux stainless steel models require a minimum 2 7/8 inch handle clearance when installed against a wall or cabinet that extends beyond the front edge of the unit.

Unit Dimensions

Width	Height	Depth
23 7/8 inch	33 3/4 - 34 3/4 inches	26 11/32 inch

Product Dimensions

Site Preparation

1. Position the unit on a flat, level surface capable of supporting the entire weight of the unit. Remember the unit will be significantly heavier once it is fully loaded.
2. This unit requires a grounded and polarized 115 VAC, 60Hz, 15A circuit (normal household current).
3. Avoid connecting the unit to a Ground Fault Interrupter (GFI). GFIs are prone to nuisance tripping which will cause the unit to shut down. GFIs are generally not used on circuits which power equipment that must run unattended for long periods of time.
4. The unit must be installed according to your state and local laws and regulations.

WARNING

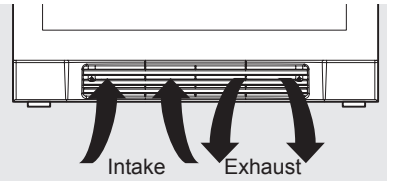

ELECTROCUTION HAZARD!

Electrical Grounding Required. This appliance is equipped with a three prong (grounding) polarized plug for your protection against possible shock hazards.

- **NEVER remove the round grounding prong from the plug.**
- **NEVER use a two-prong grounding adapter.**
- **NEVER use an extension cord to connect power to the unit.**

Where a two-prong wall receptacle is encountered or a longer power cord is required, contact a qualified electrician to have it replaced in accordance with applicable electrical codes.

5. Position the unit to allow free air flow through the front grille.

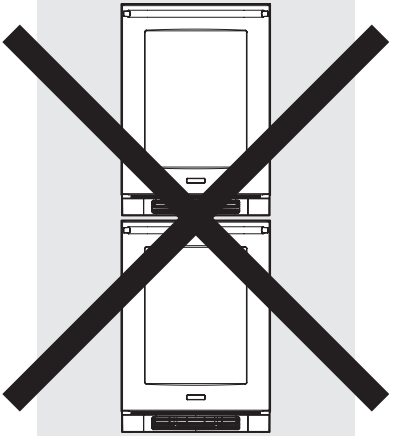

6. Wipe out inside of unit with a damp cloth.
7. Be sure to install the Anti-Tip bracket. Follow the instructions provided with the Anti-Tip bracket kit.

Installing the Anti-Tip Device

WARNING

Do not double stack two units as shown below. This may cause serious personal injury.

CAUTION

If your wine cooler is not located under a counter top (free standing), you must use an anti-tip device installed as per these instructions. If the wine cooler is removed from its location for any reason, make sure that the device is properly engaged when you push the wine cooler back into the original location. If the device is not properly engaged, there is a risk of the wine cooler tipping over, causing property or personal injury if you or a child stand, sit, or lean on an open shelf.

CAUTION

Any finished flooring should be protected with appropriate material to avoid damage when moving the unit.

WARNING

- **ALL UNITS CAN TIP**
- **INJURY COULD RESULT**
- **INSTALL ANTI-TIP BRACKET PACKED WITH UNIT**
- **SEE INSTRUCTIONS**

Floor Mount Installation

The anti-tip bracket is to be located on the floor in the left or right rear corner of the wine cooler.

Step by step instructions for locating the position of the bracket:

1 Decide where you want to place the wine cooler. Slide it into place, being careful not to damage the floor, leaving 1" (2.5cm) of clearance from the rear wall to allow room for the anti-tip bracket.

2 Raise the rear leveling legs approximately ¼" (6mm) to allow engagement with the anti-tip bracket. Level the unit by adjusting all the leveling legs as required. Turning the leveling leg counterclockwise will raise the unit and clockwise will lower the unit.

3 Make sure the wine cooler is in the desired location, then mark on the floor the rear and side corner of the cabinet where the anti-tip bracket will be installed. If the installation does not allow marking the rear corner of the cabinet, then make temporary lines on the floor marking the front corner of the cabinet, excluding the drawer. Slide the wine cooler out of the way. From the temporary line extend the sidewall line back 21½" (54.6cm).

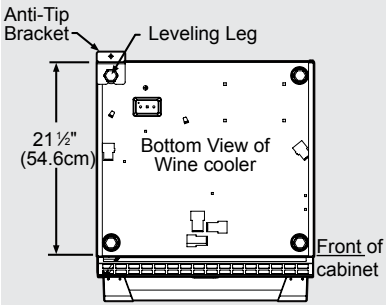

4 Align the anti-tip bracket to the marks on the floor so the side of the bracket lines up with the side of the cabinet mark, and the "V" notches on the anti-tip bracket line up with the end of the 21½" (54.6cm) line (Rear of cabinet line).

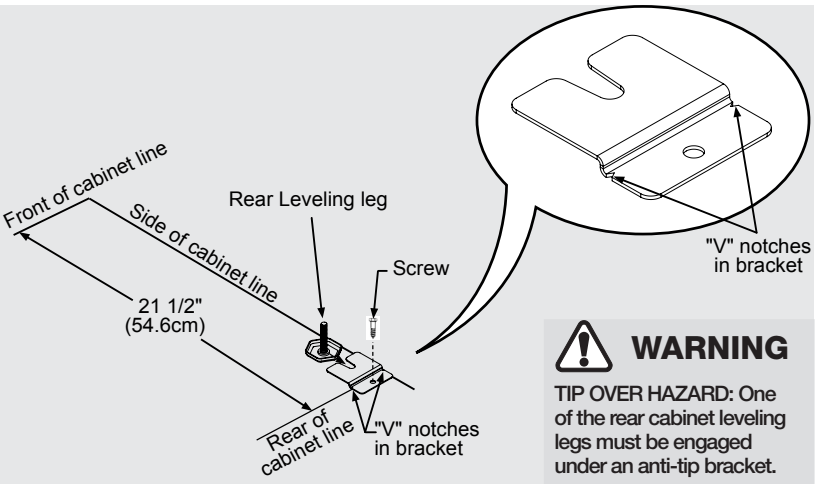

5 Fasten the anti-tip bracket to the floor using the supplied screw.

6 Slide the cabinet back into position, making sure the rear cabinet leveling leg slides under the anti-tip bracket engaging the slot.

NOTE

If installing on a concrete floor, concrete fasteners are required, (not included with the anti-tip kit).

WARNING

TIP OVER HAZARD: One of the rear cabinet leveling legs must be engaged under an anti-tip bracket.

8 Leveling

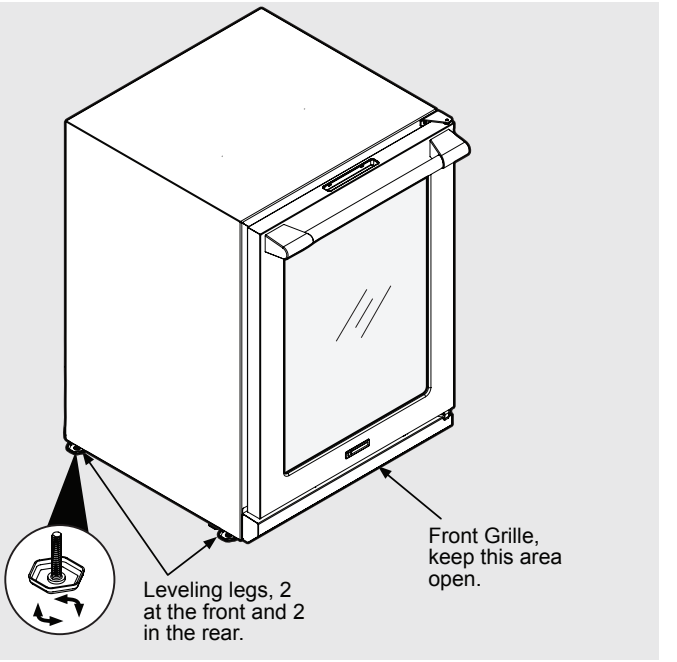

Leveling the Unit

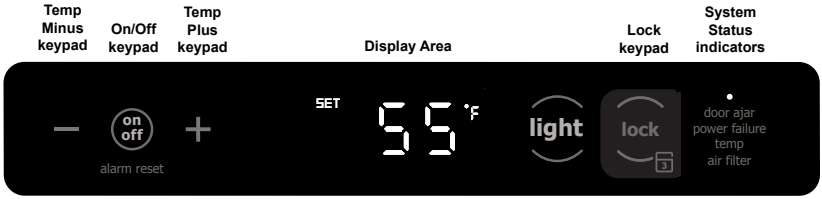

Position the unit on a flat, level surface capable of supporting the entire weight of the unit when full.

Leveling Legs

Adjustable legs at the front and rear corners of the appliance should be set so the unit is firmly positioned on the floor and level from side to side and front to back. The overall height of your Electrolux appliance may be adjusted between the minimum, 33 ¾" (85.7cm), by turning the leveling leg in and the maximum, 34 ¾" (88.3cm), by turning the leveling leg out.

To adjust the leveling legs, place the appliance on a solid surface and protect the floor beneath the legs to avoid scratching the floor. With the assistance of another person, lean the appliance back to access the front leveling legs. Raise or lower the legs to the required dimension by turning the legs. Repeat this process for the rear by tilting the appliance forward using caution. On a level surface check the appliance for levelness and adjust accordingly.

Electronic Control Display

Starting your appliance:

Plug the appliance power cord into a 115 volt wall outlet. Your appliance is shipped from the factory in the "On" position and will begin start-up of cooling as soon as power is supplied. If the appliance does not start, confirm that the wall outlet has power, and that the control is in the "On" position, (See "Turning your appliance On and Off").

The control display is covered with a clear plastic film. This film may be removed by carefully lifting the film at a corner.

On initial power up, the control display will indicate a "Power Failure" alarm. This is a normal condition as the appliance was powered-up at the factory for quality inspection and then removed from power. A momentary press of the "On/Off" keypad will reset this alarm condition. (See Alarms section).

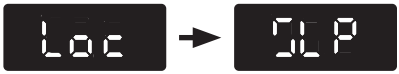

Sleep mode:

If no keypads are pressed for 60 seconds, the display will enter sleep mode to conserve power. The control panel will go dark with the exception of the system status "OK" indicator which will remain enabled. Alarm conditions will wake the display, (See Alarms section).

To make the following changes to the control settings (turning the appliance ON/OFF, adjusting the temperature, changing the interior lights, and activating vacation mode), the control must be awake.

To wake the display press any keypad. A confirm tone will sound, and the current storage compartment temperature will be displayed.

The sleep mode can be disabled if you prefer to have the display on continuously. Press and hold the "Lock" keypad until the display goes past "Loc" and reads "nSL". To enable the sleep mode, repeat the instruction, again going past "Loc" until the display reads "SLP".

Turning your appliance ON and OFF:

If the appliance is "On", (and out of sleep mode) the temperature will be shown in the display area of the control. To turn the appliance "Off", press and hold the "On/Off" keypad for four seconds. "OFF" will now be displayed on the control.

To turn the appliance "On", press and hold the "On/Off" keypad for four seconds.

Adjusting the temperature:

To set or check the set-point temperature (with the control out of sleep mode), press the "-" or "+" keypads. "SET" will be indicated on the user interface panel and the current set-point temperature will display and flash. Subsequent presses of the "-" or "+" keypads will adjust the temperature colder or warmer respectively. When you have reached your desired set-point temperature, press the "On/Off" keypad to accept, or do nothing and the "Set" mode will time-out in 10 seconds accepting the displayed temperature as the new set-point.

The available set-point temperature range for your appliance is 40°F (4.4°C) to 65°F (18.3°C). If you attempt to adjust the temperature outside of this range you will receive an audible notification.

When initially loading your product with warm contents, it may take up to 48 hours for the storage compartment temperature to stabilize.

When making temperature set-point changes, it may take up to 24 hours for the stored contents to stabilize at your new set-point temperature.

Factors that affect the storage compartment stabilized temperature:

- Changes to temperature setting.
- Room temperature changes.
- Temperature of stored contents.
  - Loading warm contents.
  - Cold content load will delay the change to a warmer set-point temperature.
  - Warm content load will delay the change to a colder set-point temperature.
- Usage, (number and duration of the door openings).
- Use of the storage compartment display lighting, (glass door product only).
- Installation of the appliance in direct sunlight or next to a heat source.

Interior display lighting: (Glass door models only)

Your appliance is equipped with a dual light level display lighting feature. With the control out of sleep mode press the "Light" keypad once to activate the interior lighting display feature at full illumination. A confirmation tone will sound, and the light bulb "Icon" will illuminate. Pressing the "Light" keypad a 2nd time will dim the lighting to 50%. A 3rd press will deactivate the display lighting feature. The display lighting will automatically deactivate after four hours.

Temperature mode:

The temperature mode is preset from the factory in Fahrenheit (°F) but you have the option to change it to Centigrade (°C). To change the mode, press and hold the "-" keypad, while pressing the "+" keypad, then release the "-" keypad.

The temperature will now be displayed in Centigrade (°C).

Repeat the procedure to change the temperature mode back to Fahrenheit (°F).

Control lock:

The control panel can be locked to avoid unintentional changes. To lock the control, press and hold the "Lock" keypad until the display reads "Loc". The lock icon will flash three times and then continuously illuminate. When the control panel is locked, only the Lock keypad, System Status OK indicator, and the Alarm indicator are active. To unlock the control panel, repeat this instruction until the display reads "nLc".

Alarms

The control will alert you to conditions that could adversely affect the performance of the appliance.

Door ajar - If the door is open, or not closed properly, for more than five minutes the System Status OK indicator will turn-off, the "Door Ajar" indicator will flash, and a tone will sound every 60 seconds. Additionally, an "ALARM RESET" indicator will be displayed below the "On/Off" keypad. This alarm condition can be reset by closing the door or momentarily pressing the "On/Off" keypad, (i.e.-if you are cleaning the storage compartment, etc.). The alarm will recur in five minutes if the alarm condition persists.

Power failure - If power to the appliance is interrupted the System Status indicator will turn-off and the "Power Failure" indicator will flash. Additionally, an "ALARM RESET" indicator will be displayed below the "On/Off" keypad. No audible tone will sound. This alarm condition can be reset by momentarily pressing the "On/Off" keypad. If this alarm occurs, it is recommended that you check the condition of any perishables, even if the appliance is operating normally and the temperature has recovered. Prolonged power outages could result in excessive temperature excursions which may spoil perishables.

Temperature alarm - If the storage compartment temperature exceeds 10°F from set-point for more than a one hour duration, the System Status indicator will turn off, the "Temp" indicator will flash, and an audible tone will sound every 60 seconds. Additionally, an "ALARM RESET" indicator will be displayed below the "On/Off" keypad. This alarm condition can be reset by momentarily pressing the "On/Off" keypad. If this alarm occurs, it is recommended that you check the condition of your stored contents, even though the appliance is operating normally and the temperature has recovered. Prolonged temperature excursions could spoil perishables.

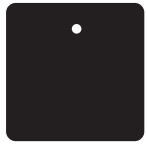

NOTE

Multiple alarms are possible, i.e.- “Door Ajar” for a prolonged period may trigger a “Temp” alarm, in which case both “Door Ajar” and “Temp” indicators will activate.

NOTE

The system status “OK” indicator (blue dot at top of alarm window) will remain lit whenever the unit is operating properly.

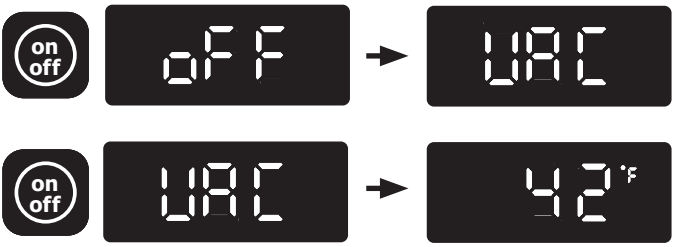

12 Operation

Vacation/Sabbath mode:

This operating mode can be used to save energy during high cost energy periods, or when you won't be using your appliance for an extended period of time. Vacation mode also serves as a Sabbath mode, disabling functions and its controls in accordance with the weekly Sabbath and religious holidays observed within the Orthodox Jewish community. When used as Sabbath mode, you may open or close the door at any time to access contents without concern of directly turning on or off any lights, digital readouts, solenoids, fans, valves, compressor, icons, tones, or alarms.

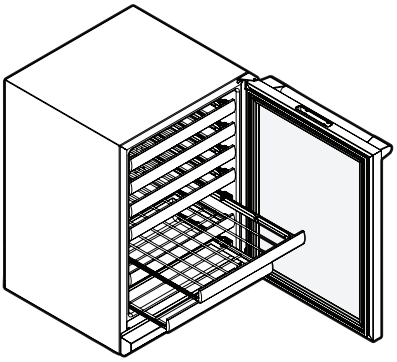

When activated, the display, alarm indicators and tones, keypad touch tones, interior lights, and all options are disabled. All keypad functions are disabled, with the exception of the "On/Off" keypad which is required to exit Vacation/ Sabbath mode. Storage compartment temperatures are monitored and controlled at the settings prior to entering Vacation/Sabbath mode. For further assistance, guidelines for proper usage and a complete list of models with the Sabbath feature, please visit the web at http:\\www.star-k.org.

To enter Vacation/Sabbath Mode (with the control out of sleep mode), press and hold the "On/Off" keypad until the display goes past "OFF" and reads "VAC". The display will flash "VAC" three times to acknowledge your request, then will display "VAC" continuously until Vacation/Sabbath mode is exited. A power outage will not exit Vacation/Sabbath mode, exiting can only be accomplished manually. To exit Vacation/Sabbath mode and return to normal operation, press and hold the "On/Off" keypad until the control displays the temperature.

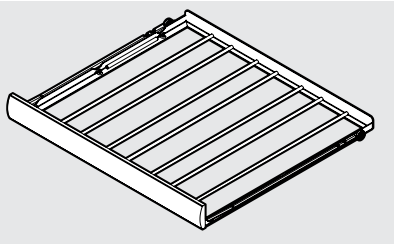

Loading Tips and Suggestions

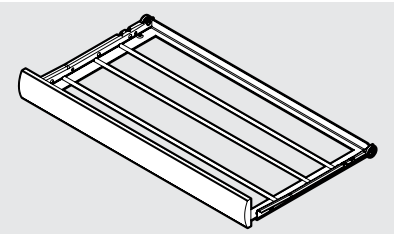

Your appliance is equipped with a cantilever shelf system which provides maximum adjustability and customization of the shelving arrangement.

Wine cooler Shelving:

- Five (5) roll-out wine racks
- Two (2) five bottle roll-out wine racks

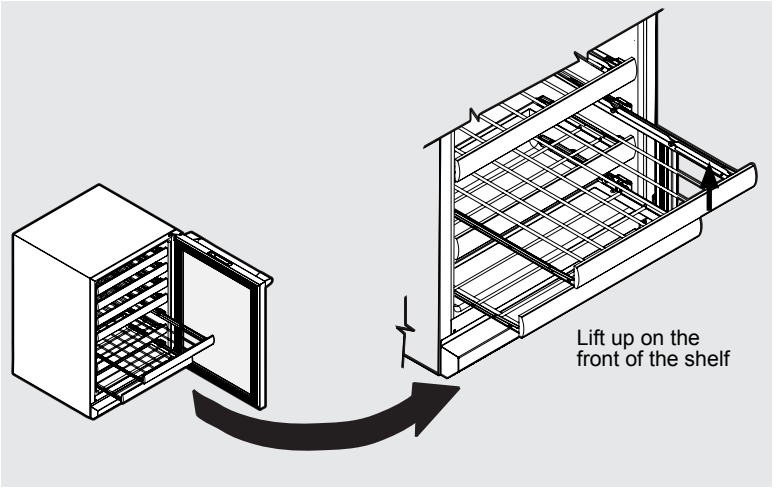

CAUTION

Never try to move a loaded shelf, remove everything from the shelf before moving. Use both hands when moving the shelf.

To remove a shelf from the frame:

- Extend the shelf out of the cabinet until it stops.
- Unload the shelf.
- Lift up on the front of the shelf to disengage the slide stops. Remove the shelf from the cabinet.

14 Maintenance

Front Grille

Be sure that nothing obstructs the required air flow openings in front of the cabinet. At least once or twice a year, brush or vacuum lint and dirt from the front grille area.

Cabinet

The painted cabinet can be washed with either a mild soap and water and thoroughly rinsed with clear water. NEVER use abrasive scouring cleaners.

Interior

Wash interior compartment with mild soap and water. Do NOT use an abrasive cleaner, solvent, polish cleaner or undiluted detergent.

Care of Appliance

1. Avoid leaning on the door, you may bend the door hinges or tip the appliance.
2. Exercise caution when sweeping, vacuuming or mopping near the front of the appliance. Damage to the grille can occur.
3. Periodically clean the interior of the appliance as needed.
4. Periodically check and/or clean the front grille as needed.

In the Event of a Power Failure

If a power failure occurs, try to correct it as soon as possible. Minimize the number of door openings while the power is off so as not to adversely affect the appliance's temperature.

Light assembly replacement

All models use an LED to illuminate the interior of the appliance. This component is very reliable, but should it fail, contact a qualified service technician for replacement of the LED.

The following suggestions will minimize the cost of operating your refrigeration appliance.

1. Do not install your appliance next to a hot appliance (cooker, dishwasher, etc.), heating air duct, or other heat sources.
2. Install product out of direct sunlight.
3. Ensure the front grille vents at front of appliance beneath door are not obstructed and kept clean to allow ventilation for the refrigeration system to expel heat.
4. Plug your appliance into a dedicated power circuit. (Not shared with other appliances).
5. When initially loading your new product, or whenever large quantities of warm contents are placed within refrigerated storage compartment, minimize door openings for the next 12 hours to allow contents to pull down to compartment set temperature.
6. Maintaining a relatively full storage compartment will require less appliance run time than an empty compartment.
7. Ensure door closing is not obstructed by contents stored in your appliance.
8. Allow hot items to reach room temperature before placing in product.
9. Minimize door openings and duration of door openings.
10. Use the warmest temperature control set temperature that meets your personal preference and provides the proper storage for your stored contents.
11. When on vacation or away from home for extended periods, set the appliance to warmest acceptable temperature for the stored contents.
12. Set the control to the “off” position if cleaning the appliance requires the door to be open for an extended period of time.
13. For wine storage products: When serving temperatures are not required, return the compartment(s) set temperature to the ideal red and white wine long term storage temperature of 13°C / 55°F.

Door alignment:

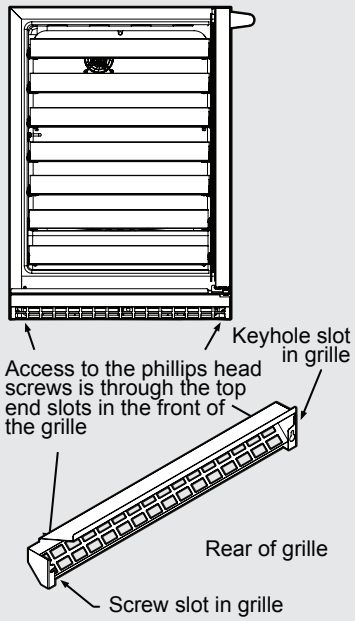

The door should be parallel to the sides and top of the appliance. If alignment is necessary the door may be adjusted by removing the grille, then loosening the two screws which secure the door adjustment bracket on the bottom of the door and adjusting the door side to side. Use a 5⁄32" Allen wrench for this procedure. When finished aligning the door, tighten the screws securely and install the grille.

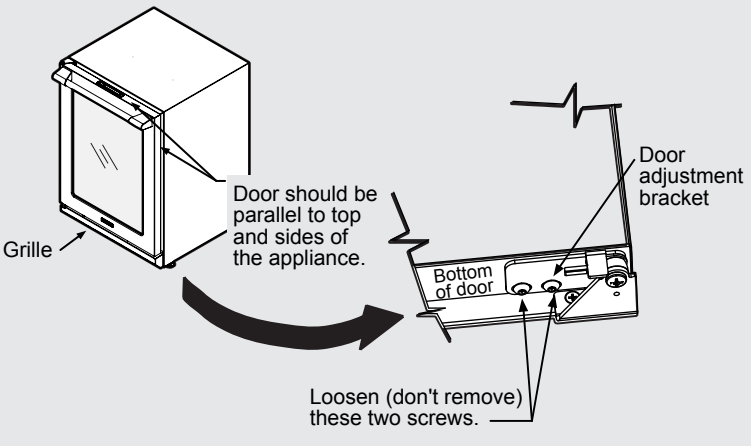

NOTE

Although not necessary, as the screws in the door adjustment bracket can be accessed with the door open, the grille can be removed in the following manner.

- Loosen the two Phillips head screws, one at each end of the grill. It is not necessary to remove them.
- With the door open raise up on the end of the grille opposite the hinges and pull toward you to remove the screw from the keyhole slot in the grille.
- Then pull the grille to the side to remove the grille.

Installation is the opposite of removal. Be sure to tighten the two Phillips head screws.

Before You Call for Service

If the unit appears to be malfunctioning, read through this manual first. If the problem persists, check the **Troubleshooting Guide** below. Locate the problem in the guide and refer to the cause and its remedy before calling for service. The problem may be something very simple that can be solved without a service call. Consulting or contracting a qualified service technician may be necessary.

If Service is Required

Contact the dealer where you purchased the unit if service is required. State the model and serial number and explain the problem. The model and serial number plate is located on the ceiling of your unit. If you do not know the name of the selling dealer or a local service company, you can check online at **www.electroluxappliances.com** or call **1-877-435-3287**.

⚠ WARNING

ELECTROCUTION HAZARD

NEVER attempt to repair or perform maintenance on the unit until the main electrical power has been disconnected.

Problem	Possible Cause	Remedy
Unit not cold enough. Adjust temperatures (see "Adjusting the Temperature" in the "Start-Up and Temperature Control" section).	• Control set too warm. • Light staying on. • Airflow to front grille blocked. • Door gasket not sealing properly.	• Adjust temperature colder. Allow 24 hours for temperature to stabilize. • Turn off manual light control. See "**Operation**" section. • Airflow must not be obstructed to front grille. See "**Installation**" section. • Adjust door gasket.
Unit too cold. Contents of unit too cold/frozen. Adjust temperatures (see "Adjusting the Temperature" in the "Start-Up and Temperature Control" section).	• Control set too cold.	• Adjust temperature warmer. Allow 24 hours for temperature to stabilize.
No interior light.	• Failed LED assembly.	• Contact a qualified Electrolux Service Technician.
Light will not go out when door is closed.	• Manual light control is ON. • Door switch not making contact.	• Turn off manual light control. See "Operation" section. • Check for proper door alignment.
Alarm(s) will not shut off.	• Door is ajar. • Power has failed. • Internal temperature is too high.	• Press "Power" key to acknowledge alarm. • Ensure door is closed firmly. • Allow 24 hours for temperature to stabilize.
Power is not restored after power failure.	• Circuit breaker has tripped.	• Verify electrical supply. See "Installation" section.
Door does not close properly.	• Door hinges are misaligned. • Door gasket is not sealing properly.	• Loosen hinges and re-align door. Retighten hinges. • Turn gasket 180°.

Major Appliance Warranty Information

Your appliance is covered by a one year limited warranty. For one year from your original date of purchase, Electrolux will repair or replace any parts of this appliance that prove to be defective in materials or workmanship when such appliance is installed, used, and maintained in accordance with the provided instructions. In addition, the cabinet liner and sealed refrigeration system (compressor, condenser, evaporator, dryer or tubing) of your appliance is covered by a two through five year limited warranty. During the 2nd through 5th years from your original date of purchase, Electrolux will repair or replace any parts in the cabinet liner and sealed refrigeration system which prove to be defective in materials or workmanship when such appliance is installed, used, and maintained in accordance with the provided instructions.

Exclusions

This warranty does not cover the following:

1. Products with original serial numbers that have been removed, altered or cannot be readily determined.
2. Product that has been transferred from its original owner to another party or removed outside the USA or Canada.
3. Rust on the interior or exterior of the unit.
4. Products purchased “as-is” are not covered by this warranty.
5. Food loss due to any refrigerator or freezer failures.
6. Products used in a commercial setting.
7. Service calls which do not involve malfunction or defects in materials or workmanship, or for appliances not in ordinary household use or used other than in accordance with the provided instructions.
8. Service calls to correct the installation of your appliance or to instruct you how to use your appliance.
9. Expenses for making the appliance accessible for servicing, such as removal of trim, cupboards, shelves, etc., which are not a part of the appliance when it is shipped from the factory.
10. Service calls to repair or replace appliance light bulbs, air filters, water filters, other consumables, or knobs, handles, or other cosmetic parts.
11. Pickup and delivery costs; your appliance is designed to be repaired in the home.
12. Surcharges including, but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expense for service calls to remote areas, including the state of Alaska.
13. Damages to the finish of appliance or home incurred during transportation or installation, including but not limited to floors, cabinets, walls, etc.
14. Damages caused by: services performed by unauthorized service companies; use of parts other than genuine Electrolux parts or parts obtained from persons other than authorized service companies; or external causes such as abuse, misuse, inadequate power supply, accidents, fires, or acts of God.

DISCLAIMER OF IMPLIED WARRANTIES; LIMITATION OF REMEDIES

CUSTOMER’S SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE REPAIR OR REPLACEMENT AS PROVIDED HEREIN. CLAIMS BASED ON IMPLIED WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO ONE YEAR OR THE SHORTEST PERIOD ALLOWED BY LAW, BUT NOT LESS THAN ONE YEAR. ELECTROLUX SHALL NOT BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES SUCH AS PROPERTY DAMAGE AND INCIDENTAL EXPENSES RESULTING FROM ANY BREACH OF THIS WRITTEN LIMITED WARRANTY OR ANY IMPLIED WARRANTY. SOME STATES AND PROVINCES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR LIMITATIONS ON THE DURATION OF IMPLIED WARRANTIES, SO THESE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. THIS WRITTEN WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY ALSO HAVE OTHER RIGHTS THAT VARY FROM STATE TO STATE.

If You Need Service

Keep your receipt, delivery slip, or some other appropriate payment record to establish the warranty period should service be required. If service is performed, it is in your best interest to obtain and keep all receipts. Service under this warranty must be obtained by contacting Electrolux at the addresses or phone numbers below.

This warranty only applies in the USA, Puerto Rico and Canada. In the USA and Puerto Rico, your appliance is warranted by Electrolux Major Appliances North America, a division of Electrolux Home Products, Inc. In Canada, your appliance is warranted by Electrolux Canada Corp. Electrolux authorizes no person to change or add to any obligations under this warranty. Obligations for service and parts under this warranty must be performed by Electrolux or an authorized service company. Product features or specifications as described or illustrated are subject to change without notice.
