

### TRUE BLUE® VIALS

Many True Blue® measuring instruments contain True Blue® vials and achieve new benchmarks for accuracy. They are produced through a proprietary process called Advanced Concentric Molding (ACM™), which was pioneered by Empire. The process assures repeatability, so that all True Blue® vials meet the same stringent standards for accuracy, consistency, and concentricity. True Blue® can be found in more than 4,000 locations throughout the U.S., and are backed by the strongest warranty in the industry.

### TRUE BLUE® LIFETIME WARRANTY

Empire True Blue® levels and squares are warranted to be free from imperfections in materials and workmanship. If your Empire product is defective or has failed with normal use, you may return it to the place of purchase for replacement. With proper care, your True Blue® levels and squares will remain accurate and provide you with years of satisfaction. Bent level frames void the warranty.
